

| Tubular lifter

| SAFETY | EASE OF USE | NO DISTORTION
| PRODUCTIVITY INCREASE | COST REDUCTION

Application: gas, oil, water, wind.

Type of companies: pipe manufacturer, equipment manufacturer, blade manufacturer, logistics company, wind turbine assembly, mast and bases.

References: Bouygues, Capelle, Spiecapag, Europipe, Graftech, Vallourec, Dewulf Cailleret.

Load capacity

Up to 30 tons.

Main component list

Vacuum tank, vacuum pump, suction pad, central unit, security components.

Production time

8-12 weeks.

Spare part delivery conditions

Delivery 10-15 days with standard usual spare parts.

Connecting systems

Crane, stacker, mobile crane, crane turret, forklift, excavator, side boom, gib, truck crane, motorized carriage.

Wear parts

Suction pad, vacuum hose, pump, electro valve, vacuostat, vacuumeter.

Options

Control of suspended load, camera wireless, remote control.

Handling type possibilities

Horizontal, vertical, 360° rotating.

Security system

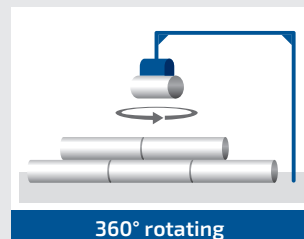

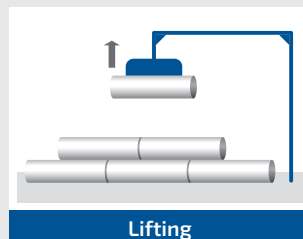

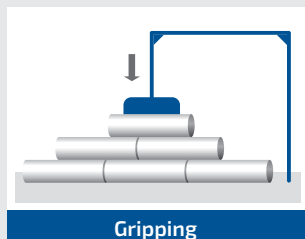

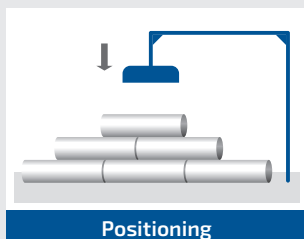

Horning & lighting system, vacuum tank, visual system, battery save signal.

Security parameters

Security coefficient 2, 80% vacuum level guaranteed, holding time increased from 5 to 20 min.

Country standards

ISO 9001, AFNOR EN 13155, DIRECTIVE MACHINE 2006/42/CE. ACIMEX has the capacity to adjust its production tool to specific country standards.

This document shows general features: each product can be adapted as ACIMEX designs turnkey solutions for its clients
